**About GCM Resources plc**

GCM Resources plc (LON: GCM), the AIM traded mining and energy company, has identified a high-quality coal resource of 572 million tonnes (JORC 2004 compliant) at the Phulbari Coal and Power Project (the "Project") in north-west Bangladesh.

Utilising the latest highly energy efficient power generating technology the Phulbari coal mine can support some 6,600MW. GCM requires approval from the Government of Bangladesh in order to develop the Project. The Company has a strategy of linking the Company's mine proposal to supplying coal to the Government of Bangladesh's existing and in the pipeline coal-fired power plants and / or power plants developed development partners. Together with credible, internationally recognised strategic development partners, GCM aims to deliver a practical power solution to provide the cheapest coal-fired electricity in the country, in a manner amenable to the Government of Bangladesh.
